

## ▶ PM Series

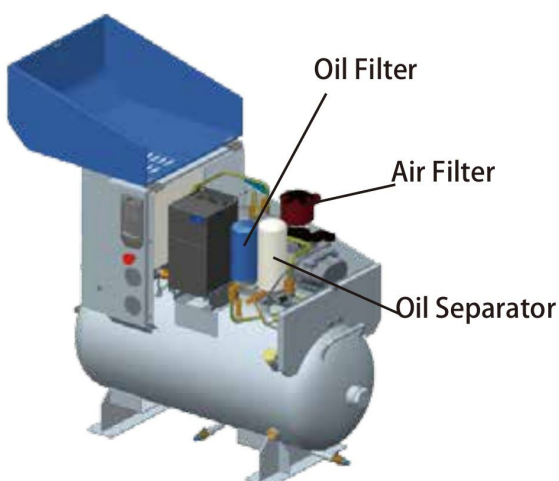

### Low energy package power

Featuring the latest oil cooled IP65 permanent motor with increased efficiency over an IE4 motor. The motor has a high operating temperature of 180 degrees to ensure any motor demagnetisation does not occur. The PM machine has a wide operating band , making it one of the most efficient machines on the market.

### Ultra-quiet

The oil cooled PM range of machines have a low operating noise of 68dB(A)

### Constant pressure

Vent to achieve constant pressure state, reflect the true sense of energy-saving

### Easy to maintain

A simple flip top design means that all components are easily accessible for maintenance. The compressor is also available with optional locking wheels making the whole design convenient to use. Technical specification
